## **From the Desk of the Manager:**

Spring is finally here!!! If you cannot open your outside hose bibs and attic vent, please contact the office and we will write up a work order to have it done for you.

The Board of Directors has approved the use of propane fire pits for recreational use. Before rushing out to buy one, you will need to go on line at our web site, [www.fulmorheights.com](http://www.fulmorheights.com) visit or the office to obtain a registration form and the policy for usage. This is a great opportunity to relax in your rear yard around a fire however, there are strict rules for us to follow. If we all follow these guidelines, we all can enjoy this new found recreational atmosphere for years to come.

For those of you who missed our April General Meeting, we had Chris Mendel of the Pennypack Ecological Restoration Trust spoke to us about the better ways to find solutions to improve water quality and storm resilience within the watershed. Now, how does that affect us? The two creeks that flow through FH HOA are major tributaries to the watershed. They feel with FH HOA as a partner in restoration of our waterways by adding vegetation, storm water controls e.g. rain gardens this will greatly improve the water quality, reduce erosion and stimulate the ecosystem both in FH HOA and the watershed. Chris is currently in the process of applying for grant money to pay for the cost of these endeavors. Not only will a project like this improve the ecosystem, it will also beautify the creek area as well. For further information, please feel free to stop in my office or ask me when you see me walking around the community.
