ADDUNDUM FP 41619 Refer to page 25 paragraph 9

Properly located propane gas fire pits can be used for recreational purposes with the following limitations:

1– Choose a Safe Installation Spot

When you install your propane fire pit, choose a spot that is at least 10 feet away from your home and other outdoor structures. Propane gas fire pits shall not be used on wooden decks or combustible surfaces. Make sure there are no pipes underneath and no electric wires overhead. Also keep foliage and trees a safe distance away from the fire pit.

2– An A B C rated Fire Extinguisher must be available

In the event of a fire, you must know what steps to take. Prompt action can avert a tragedy. Before using the propane fire pit, familiarize yourself with its functioning and all the parts. You must know how to turn off the gas supply and control a fire that gets out of hand. Keep a fire extinguisher handy and make sure it is not expired and that everybody in your home knows how to use it. You can also manage most fires by pouring water or dumping sand on the blaze.

3– Keep Area Free of Clutter

Keeping objects close to the fire pit increases chances of ignition and flames. Such flames can quickly get out of control and start a blaze. Keep the area around the fire pit clean and clear at all times. Never keep combustible substances or liquids in the vicinity. Never leave children unattended in the vicinity of a fire pit.

4– Clean Burners and Pipes Regularly

A blocked or dirty burner or pipe can cause a buildup of gas, which can be very dangerous. Periodically, you must clean out these parts. This is especially important if you are using the fire pit after a gap of several months. Sometimes you may find insects nesting inside the burners, contributing to a blockage.

5– Check for Leaks

Before turning on the propane fire pit, rule out any leaks. Check all the connections and valves for any signs of a leak. If you discover one, turn off the gas supply immediately and tighten the connections.

6– Shut off Gas Supply in Case of Emergency

In case of an emergency, the first step to take is to turn off the supply of propane. If the fire is so big that it cuts off your access to the propane supply, try to dampen it by pouring water or putting sand on it. Then try again. If you are unable to do this, call the fire department immediately. Each propane gas fire pit must have a shut-off valve installed near the fire pit to allow for quick fuel shut-off in the event of an emergency.

7 – Never Add Gasoline, Paper or Fuel

A propane fire pit does not require any starters or accelerators to increase the strength of the flame. Never pour gasoline into the fire pit or add paper, trash or combustible matter. Use a screen to prevent the spread of sparks.

8 – Insurance Coverage

Condominium insurance (HO-6 Policy) listing Fulmor Heights Home Ownership Association as additionally insured is mandatory.

No propane gas fire pit shall be left burning unattended. An Adult Member must be present at all times when a fire is burning. This is a fire safety issue.

Propane gas fire pits are the ONLY device approved for outside burning.

All propane fire pits must be registered at the office prior to use.

Propane fire pits are restricted for use in the rear yards only.

Any Violation of This Policy Will Result in Forfeiture of the Fire Pit Privilege.
